

Federal Aviation Administration selects Higher Power Aviation For Boeing 727 Inspector Training

Grand Prairie, Texas, December 13, 2003 – Higher Power Aviation, Inc., an airline crew training center, has been awarded an interim contract for Boeing 727 training by the U.S. Department of Transportation’s Federal Aviation Administration (FAA). This is the third contract Higher Power Aviation has been awarded by the FAA in the last eight months.

Higher Power Aviation (HPA) will provide initial and recurrent training to FAA Aviation Safety Inspectors for the Boeing 727 model aircraft. Training will include ground school, full flight simulator and the option of aircraft training.

Based in the Dallas-Fort Worth International Airport (DFW) area, Higher Power Aviation (HPA) is the leading FAA part 142 approved training center providing Boeing 737 type rating training to individual pilots for employment at Southwest Airlines and other operators. HPA further provides cockpit and cabin crew training on Boeing 727, DC-9 and MD-80 series aircraft, and all models of the Boeing 737, from the Classic to the Boeing 737 New Generation (NG) Aircraft, including the C-40A aircraft for the U.S. Navy. Moreover, Higher Power Aviation also provides Boeing 737 NG training to the FAA under a separate contract.

HPA offers innovative training and crewing solutions to individual pilots, VIP executive flight operations, domestic and foreign airlines, governmental agencies, military entities, freight operators and other aviation concerns. HPA trains thousands of pilots on jet transports and customers include Southwest Airlines, American Airlines, Boeing, CAE, Conoco, L-3 Communications, and numerous airline and VIP operations. More pilots choose Higher Power Aviation for their FAA Boeing 737 type rating training than any other training center.
