

Sun Country Airlines selects CAE and Higher Power Aviation for Boeing 737NG Pilot Training

Grand Prairie, Texas, July, 2003 - Higher Power Aviation, Inc. and CAE announced today that it will provide training to Sun Country Airline pilots flying the Boeing 737NG aircraft. Beginning August 2003, the CAE Dallas Training Center will train the Sun Country pilots in its facilities utilizing Higher Power Aviation instructors and training program.

Initial and recurrent pilot simulator training will be provided in CAE's new facility just south of Dallas-Fort Worth (DFW) International Airport. The contract was signed with MN Airlines LLC, d/b/a Sun Country Airlines.

Higher Power Aviation, Inc. is an FAA Part 142 certificated simulator training center operating in the DFW area and is a leading training provider offering innovative training solutions to individual pilots, VIP operations, domestic and foreign airlines, governmental agencies, military entities and other aviation professionals. Further, HPA provides flight crewing services and regulatory certification consulting and training for FAR part 125 operators, start-up air carriers and those adding new types of aircraft to their operating certificate. More pilots choose Higher Power Aviation for their Boeing 737 type rating training than any other training center worldwide.
